Description of Organization: Providing pro bono legal assistance, workshops, and trainings to farmers, food entrepreneurs, and related organizations in order to foster a sustainable, resilient, and just food system. At CLF, we believe that a thriving New England means a thriving local food system—the region’s environment, climate, and economy depend on it. There is a robust movement afoot to sustain New England’s communities with locally grown food, but many farmers and food entrepreneurs struggle to overcome the high legal fees associated with starting a farm or business, acquiring land, entering into contracts, transferring land to family members, or other essential business matters. Legal services can be so costly that some farmers and food entrepreneurs either go without, or pay more than they can afford, harming other aspects of their businesses’ economic viability. In the worst-case scenario, farmers or food entrepreneurs lose their businesses or exit the field due to these and other financial hurdles. CLF seeks to help address this problem through the Legal Food Hub.
